

## DEPARTMENT OF SWASTHVRITTA

### Introduction :

A real strength of Ayurveda is preventive measures and maintaining good health which is included in subject Swasthavritta. So this subject is very much important in faculty of Ayurveda.

According to CCIM, Swasthavritta syllabus also contains preventive measures of Modern science, Yogshastra and Naturopathy. The content of subject is very useful to create such students, who are able to bring about welfare of the society with the help of science of Ayurveda along with Yogshastra and Naturopathy.

### Objectives :

At the end of the course the students shall be able to explain the concept of health; they should advice an appropriate healthy regimen to patients. They should discriminate various food articles and its usefulness as a diet consultant to the community.

While serving the community they should identify various conditions that can lead to the spread of communicable diseases and non - communicable diseases and its preventive measures according to Ayurveda and modern medicine with the help of Yoga therapy and Naturopathy. They should understand the principles and components of primary health care and the national health policies to achieve the goal of "Health for all".
